PROFESSIONAL EXPERIENCE

Infinity's End (6/13/2006 – Present)
Inventory/Warehouse Manager

· Manager for a team of 6 employees and 5 locations

· Logistical coordination of inventory movement and stock for each location

· Cost Analytics of budgeting, purchasing and sales

· Process and reporting metrics to management for quality control

· Administration of Retail Pro for all inventory items and reporting

Software Engineering Immersive (Student), 2020 – 2021

· Created an interactive weather dashboard that displays current and forecasted weather for any city entered in the UI; used HTML, CSS, JS, JQuery, and two API calls
https://jongudenzi.github.io/weather_dashboard/

· Created a Random password generator that asks the user a set of questions using confirms to create the appropriate password style requested; used HTML, CSS, JS
https://jongudenzi.github.io/password-generator/

Noted Projects:

· Developed a music history application that provides top hit songs of any date in time entered in the UI. The application also displays links to Wikipedia bio and link to music video for the number 1 song of that day. Developed by a team of three; used HTML, CSS, Materialize, JS, JQuery, and three API calls
